A sale of veribe Bonds and bearing dividend only from 10th January lost, was made at 102. Burlington and Quin-cy, the first sale at our Board, we think, sali at 100. Very much of the late rise in our Stock market is due to the buying in of short stock by the hears, who do not like the favorable appearance presented by fisancial affairs, but the bulls are confident of the future, and are large buyers. Railroad Bonds are steady. Illinois Central advanced to 100): Sombern Michigan Sinking Fund to 78; Lake Eric and Wabash 2d Mortgage to 43, &c. State Stocks are also firm. There is no new feature in the money market to-day. The supply on call is abundant and the ease in carrying stocks is shown by the buoyancy of the markel. Paper of first class is 9 a 10 P cent.

Notwithstanding the great beaviness of the market for silver, and the apparent fact that importations of it from the continent connot now take place except at a less, gold continues to be withdrawn from the Bank to pay for purchases effected. Yesterday the amount taken was only £10,000, but to-day it has been £120,000. This continental drain would tend to revive the recent anticipations of the necessity of some new restrictions on the part of the Bank, were it not for the circumstance that its effects are still fully sounteracted by an indica of sovereigns from Ireland and other sources. soprces.
